

31 August - 2 September 2026, Aegina, Danae Hotel

Conference Program

Day 1: Monday 31st August 2026

9.00-10.30 Registration

10.30-12.00 Short Course: State space models in economics (Part A) by **Jonas Andersson** (Norwegian School of Economics)

12.00-12.15 Coffee Break

12.15-13.45 Short Course: Topics in high dimensional regression analysis (Part A) by **George Kapetanios** (King's College London)

13.45-15.00 Lunch Break

15.00-17.05 Research Presentations

John Kornak (University of California) *An MCMC approach to Bayesian image analysis in Fourier space*

Aristeidis Raftapostolos (King's College London) *Nowcasting U.S. inflation with deep Bayesian neural networks*

Evangelos E. Ioannidis (AUEB-Stats) *Modeling and forecasting stochastic seasonality: Are seasonal autoregressive integrated moving average models always the best choice?*

Andrea Vaiano (Sapienza University of Rome) *Did we sow the seeds of growth? Evaluating the impact of European structural funds with a distributional approach*

Giorgos Malanos (AUEB-Economics) *Adversarial estimation of nested logit demand, with an application to Greek Aegean gasoline markets*

Day 2: Tuesday 1st September 2026

9.30-11.00 Short Course: Topics in high dimensional regression analysis (Part B) by **George Kapetanios** (King's College London)

11.00-11.15 Coffee Break

11.15-12.45 Short Course: Demographic ageing and the sustainability of the pension system: Greece and the European Union (Part A) by **Panos Tsakloglou** (AUEB-IEES & Bank of Greece)

12.45-14.00 Lunch Break

14.00-16.30 Research Presentations

Manasa Patnam (International Monetary Fund) *Global imbalances, tariffs and industrial policy*

Prodromos Tsinaslanidis (University of Western Macedonia) *Statistical rigor and reported profitability in technical analysis research*

Thanassis Kazanas (Aristotle University of Thessaloniki) *Non-linear dynamics in the conduct of monetary policy: An empirical analysis of inflation-driven regime switching*

Konstantinos Perrakis (AUEB-Stats) *Bayesian cluster weighted Gaussian models*

Nikos Demiris (AUEB-Stats) *On robust Bayesian causal inference*

Christos Thomadakis (AUEB-Stats) *Dirichlet process random effects in linear mixed models: A centering-aware MCMC algorithm*

20.00-21.00 Poster Session

1. *Liquidity and volatility drive green bond premiums* by **Konstantinos Bisiotis** (National and Kapodistrian University of Athens & AUEB-Stats)
2. *Towards sampling-free Bayesian variable selection in logistic regression* by **Argyro Damoulaki** (AUEB-Stats)
3. *Causal inference using Bayesian methods* by **Stylianios Grammatikakis** (AUEB-Stats)
4. *Bayesian approaches for predicting dementia onset and progression from longitudinal neuroimaging data* by **Athanasia Kalogirou** (AUEB-Stats)

5. *Prediction and mapping of spatio-temporal risk: A Bayesian approach with machine learning extensions* by **Foteini Kampa** (National and Kapodistrian University of Athens)
6. *Are commodity markets segmented? Understanding cross-asset interdependencies using stochastic spanning* by **Argyro Kofina** (AUEB-IEES)
7. *Graphical Ising models for missing data patterns detection in sustainability surveys* by **Andrea Mecca** (University of Florence & University of Siena)
8. *Model based clustering for bivariate mixed type time series* by **Anna Nalpantidi** (AUEB-Stats)
9. *Is the wage Phillips curve still alive? Evidence from Greece, 1960–2023* by **Angelos Rammos** (AUEB-Economics)
10. *Factor analysis for psychometric data: A study using the SPQ questionnaire* by **Zoe Sagri** (AUEB-Stats)
11. *A simulation study comparing Fisher's exact test, Barnard's test, and Boschloo's test in two- and three-group contingency tables* by **Bernhard Schipp** (Dresden University of Technology)
12. *The future of wine: Data-driven market opportunities* by **Paris Spiliotis** (AUEB-Stats)
13. *Mobilisation episodes and fiscal capacity: Evidence from the 19th century* by **Christos Zogopoulos** (AUEB-IEES)

Day 3: Wednesday 2nd September 2026

9.30-11.00 Short Course: State space models in economics (Part B) by **Jonas Andersson** (Norwegian School of Economics)

11.00-11.15 Coffee Break

11.15-12.45 Short Course: Demographic ageing and the sustainability of the pension system: Greece and the European Union (Part B) by **Panos Tsakloglou** (AUEB-IEES & Bank of Greece)

12.45-13.00 Coffee Break

13.00-15.05 Research Presentations

Daphne Nicolitsas (AUEB-Economics) *Selection or school effects? Evidence from model and Experimental Lyceums in Greece*

Angelos Alexopoulos (AUEB-Economics) *Causal effects of evolving regulatory protocols: The case of the post-crisis capital framework for large U.S. banks*

Panagiotis Papastamoulis (AUEB-Stats) *Modelling time-to-default data with Bayesian cure rate models*

Nikos Sarris (AUEB-IEES) *Capacity constraints & market imperfections on renewable energy sources: Modelling through a Green Ramsey framework*

Konstantinos Kitsios (National and Kapodistrian University of Athens) *A time-series structural causal model to assess the impact of exercise oncology on oncological treatment tolerance and clinical course*
